EDUCATION

HCMC University of Technology

2020-09/2024

- Major: Information Technology

SKILLS

CERTIFICATIONS

- ENGLISH B1
- TEAMWORK SKILL

Coding Languages:

- HTML5 & CSS
- Javascript
- TypeScript
- BOOTSTRAP
- JQUERY
- NodeJs

Framework:

- ReactJs
- NextJs
- Sass
- Express
- NestJs

Database:

- MySQL

Computer Networking

- RESTfulAPI

Technical

- JWT, BCrypt, Redis

- I am currently a four-year student at Hutech university. I have knowledge of FrontEnd. Technologies such as HTLM, CSS, JS as well as learning basic BackEnd including Nodejs and Restful API. I also have a basic understanding of Github.

OBJECTIVE

- Desire to become a Frontend Developer, participate in real projects and learn more from colleagues and colleagues. I have basic Nodejs knowledge and am still learning to improve my skills.
- In the next 2 years, I want to become a Fullstack Developer, learn and adapt to programming languages and new technologies to support my work.

PROJECTS EXPERIENCE

● Intern, DATVIETSOFTWARE (04/2024 - 07/2024)

- Contributed to the development and enhancement of the admin dashboard interface.
- Participated in the implementation of payment functionalities, ensuring seamless and secure transactions.

● Job search website (12/2024 - 2/2025)

Team size: 1

https://github.com/Yeager1711/Jobmarket_Ui

- User-friendly interface: A simple and intuitive design that allows users to easily search and apply for jobs with just a few clicks.
- Smart job recommendations: The system analyzes the applicant's uploaded CV and suggests suitable job opportunities based on their skills, experience, and interests.
- Flexible job search: Users can search for jobs by location, salary, job position, or skill tags, making it easier to find the right job.
- Chart data updates: The system uses Python to crawl job listings from multiple sources, ensuring the latest and most diverse job opportunities.

● Website Movie Ticket Booking 12/2023 - 4/2024)

Team size: 4

Position in project Leader

<https://github.com/Yeager1711/fe-react.git>

- Our website serves as a movie showtime management and ticket booking platform. Users can easily browse through available movies and choose the right showtime. They can easily search and select specific showtimes, food combos during the booking process and pay via MOMO or PayOs.
- Administrative features include the ability to create showtimes for the next seven days, create screening rooms, manage booked tickets and filter the booked ticket list by movie, date and time, manage payment gateways.
- Technology stack:
 - **Front-end:** ReactJS & SCSS
 - **Back-end:** Node.js Express for API creation
